### **ITC TO REVIEW ADMINISTRATIVE LAW JUDGE'S DECISION**

Mems Technology Berhad ("MemsTech") announced on March 15, 2009 that the U.S. International Trade Commission ("ITC") will review the Initial Determination by the Administrative Law Judge in the ITC investigation based on Knowles Electronics LLC's complaint pursuant to section 337 of the Tariff Act of 1930. The Commission's Final Determination is scheduled to be issued by May 14, 2009.

"We are very encouraged that the Commission has decided to grant our petition to review the Initial Determination," said Kathirgamasundram Sooriakumar, Chief Executive Officer of MemsTech. "We continue to believe the Initial Determination made by the Administrative Law Judge is erroneous and that the Final Determination by the ITC will be made in MemsTech's favor."

MemsTech designs and manufactures MEMS based products, as a true variety based supplier in the MEMS industry. The products include: pressure sensors, accelerometers, thermopile assembly services, thermopile arrays, binary lens, and silicon acoustic products. The company focuses on delivering products, services and technology to suit both customer design specific products, standard MEMS based products, MEMS manufacturing services and MEMS wafer fabrication services.
